Each specific lone worker is identified and a score is given dependent on the answers given

From the weighted score safety devices are allocated to the each lone workers

Departments can be segmented within the organisation

Additional comments can be made for each question to give opinions for a qualitative view point

This unique online tool allows a lone worker manager, whether you deal with health and safety, facilities or human resources, a manager to assess the needs of the department and to assist in the collection of the views and opinions of staff - this is a vital aspect of consultation required for best health and safety to be practiced within an organisation.

The online tool is available from Peoplesafe for **FREE** and can be quickly and easily deployed to organisations via a web link. The above example illustrates the type of information you will receive.

### What does the online survey do?

- Find out how many lone workers there are in your organisation
- Assess each lone worker's individual risks
- Assess the environment they are working in
- Assess the tasks they perform and the risks involved
- Allocate the right safety device for each lone worker
